EDUCATION

University of California, Davis *Expected June 2028*
B.S. Electrical Engineering | GPA 3.7 | Dean's List: Fall 2025, Winter 2025

RESEARCH EXPERIENCE

Undergraduate Robotics Researcher *Jan 2026 - Present*
Laboratory for AI, Robotics, and Automation (LARA) | UC Davis

- Diagnosed I2C bus contention behind two-second teleoperation crashes in a 19-actuator robotic hand; rewrote firmware on both signal paths to sustain control at approximately 50 ms end-to-end latency.
- Designed and tested custom control PCBs from schematic through bring-up, adding I2C pull-ups and dedicated voltage regulation.
- Traced limited simultaneous motion to a shared power feed through the PCB stack, then designed a separate parallel power distribution board in KiCad; verified all motors at full PWM without freezes or motion lag.
- Integrated two wrist rotary actuators into a Manus glove, PyBullet, and micro-ROS teleoperation pipeline, extending control from hand joints to wrist articulation.

SELECTED PROJECTS

BCI Prosthetic Leg Control *Dec 2025 - Jun 2026*
Neurotech Club Projects Division | OpenBCI Cyton and Arduino Mega test rig

- Built a Python EEG decoder using BrainFlow acquisition, 8-30 Hz filtering, CSP features, and LDA scoring; sent decisions to an Arduino Mega serial trigger for bench testing.
- Added dry-run-first output, decision thresholds, refractory timing, and REST-trial blocking; used replay and file-holdout checks before physical actuation.

PyBCI Live EEG Interface *Jan 2026 - Present*
Open-source contribution to EEG research software

- Built the live EEG acquisition and streaming backend, connecting board data to the research interface.
- Implemented stacked real-time EEG plots and start, pause, save, and stop recording controls in the frontend.

ADDITIONAL EXPERIENCE

Customer Service Representative *Jun 2024 - Sep 2025*
Cherry Chase Pet Hospital | Sunnyvale, CA

- Managed client communication across phone, email, and front desk; coordinated appointments and intake with veterinary staff during peak clinic hours.

PUBLICATION

The Implementation of Ethical AI Within Autonomous Vehicles *2024*
Journal of Student Research

TECHNICAL SKILLS

Programming and firmware: C/C++, embedded C, Python, Java, MATLAB
Electronics and CAD: KiCad, SolidWorks, PCB schematic and layout, board bring-up, I2C, Teensy, soldering
Robotics and neurotech: micro-ROS, PyBullet, BrainFlow, OpenBCI Cyton, EEG signal processing
Tools: Git, Linux, prototyping
